

Bell Copper Corporation (TSXV: BCU | OTCQB: BCUFF)

Advancing a concealed porphyry copper discovery in Arizona

INVESTMENT HIGHLIGHTS

- Confirmed copper discovery at Big Sandy (100%)
- Mineralization open — step-out drilling (BS-4A)
- Exposure to second porphyry system (Perseverance JV)
- Strong metallurgy + multi-metal upside (Cu, Ag, Re)

BIG SANDY — FLAGSHIP

- Concealed porphyry Cu–Mo system confirmed
- BS-3: **200 m @ 0.42% Cu (2.4 g/t Ag)**
- Geological indicators support potential for scale
- Step-out drilling (BS-4A) underway

WHY BELL COPPER

- Two porphyry systems, multiple discovery paths
- Discovery-stage asset with expansion potential
- Located in Arizona Arc (major copper belt)
- Proven porphyry discovery team
- Featured in academic & government research studies

METALLURGY

Copper

82–84% recovery | ~25% concentrate grade

Silver

~130 g/t | ~68% recovery

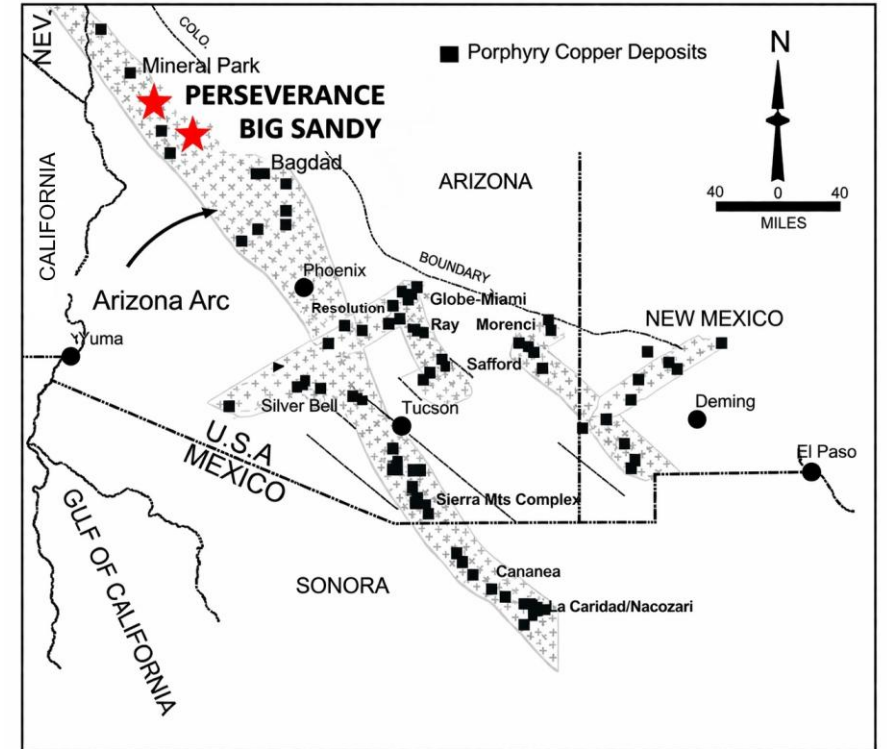

Rhenium

~1,700 g/t (est.) potential | Mo-linked

SHARE CAPITAL

As of April 2026

- Shares Outstanding: **144.8M**
- Fully Diluted: **180.2M**
- Warrants: 9.9M
- Options: 25.5M

Located within the Arizona Arc — a prolific porphyry copper belt hosting multiple world-class deposits.
